

## Wolf Whisper

The myth of the werewolf, a man taking on the form of a wolf during the full moon, emerged out of one man's desire to hear the whisper of the wolf. Yet man did not listen and would not hear the whisper of the wolf, how humans had been seduced.

So man made the werewolf something evil, to prevent future generations from listening.

I bring you the whisper of the wolf in pure form.

The eyes of the wolf as direct offspring of the timbers can still see across time and space.

When needed, wolves can still stand alone, sing to the full moon, and hear the full moon sing back to them in their language.

Still honoring the pack. Always knowing their position.

Ever seeing their reflective relationship to earth as children of the timbers.

Ever comfortable walking between Water and Earth. Ever crying for humans, for in a short time, we have lost all of that which the wolves have found a way to hold on to the essence of their souls.

Hear the howling wolves every full moon and find your way back to the essence of your soul.
